Experiment 2: Active Filters

Department: 電機三

Name : 楊正彦

Student ID: b03901086

Class Number:三早

1. Experiment Objectives

1.1. To design Second-Order Active Filter by using OP-Amp as an active device, and resistance and capacitance as passive devices.

2. Experiment Setups

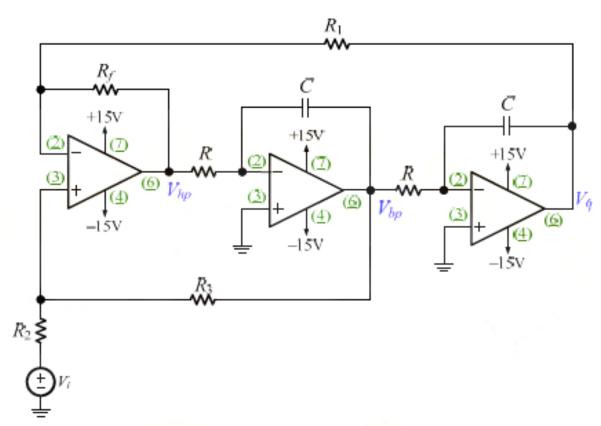

Fig. 1 Two-Integral-Loop Active Filter

- 1. 利用訊號產生器輸入訊號Vi,並接到CH1。
- 2. 輸出端分別有高通、低通及帶通,將它們分別接到CH2做觀察。
- 3. 紀錄voltage gain, 3-db frequency等等,並改變頻率做觀察,記錄不同頻率下的 Vo。
